

# Plastic bag (Plarn) Sleeping Mats

Thank you for helping to reduce and reuse those pesky plastic shopping bags sitting around your house! Our first event will be the evening of January 21<sup>st</sup> at 6:30pm, but if you would like to get started with the items you have at home, please do the following:

1. Check the bag for any holes and tears and remove any receipts or stickers.
2. Flatten the bag by allowing the sides to fold in.
3. Cut off the bottom fold at least the width of one finger width.
4. Measure down below the handles by at least 2 finger widths and cut across.
5. Then cut the strip in half which should be approximately 6" wide. If you have a larger bag sometimes three strips of 6" width is possible to cut, but please measure to ensure it's not smaller.
